Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 14-20 and 31-33 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose an endoscopic imaging system comprising a plurality of adjusting elements for adjusting various properties of a video signal sent from a video signal processor, an electrical connector for enabling detachable connection at an external storage unit to the endoscopic imaging system for storing adjustment values to be set by the adjusting elements, and a controller for modifying settings of the adjusting elements according to the adjustment values stored in the external storage unit.

It is noted that the closest prior art, Hiyama et al. (US Patent no. 5379757), discloses a similar endoscopic imaging system. However, Hiyama fails to particularly teach or suggest *“a plurality of adjusting elements for adjusting various properties of a video signal sent from a video signal processor, an electrical connector for enabling detachable*

connection at an external storage unit to the endoscopic imaging system for storing adjustment values to be set by the adjusting elements, and a controller for modifying settings of the adjusting elements according to the adjustment values stored in the external storage unit." as specified in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
